

CHANDRU CHANDRAN

GAME DEVELOPER | VR DEVELOPER

Chennai, India | 8270773803 | chandru Chandran@gmail.com

Portfolio: chandru Chandran.github.io/chandru-portfolio/

LinkedIn: linkedin.com/in/chandru-chandran-b46b312aa/

Professional Profile

Game and VR Developer with professional experience in real-time 3D development, VR simulation, architectural visualization, medical visualization, and interactive applications. Experienced with Unreal Engine, Blueprint development, VR interaction design, level design, networking, performance optimization, and interactive real-time systems. Hands-on experience delivering PC and VR applications across visualization, simulation, embedded systems, and interactive media.

Core Technical Skills

- Game / 3D Development: Unreal Engine, Blueprint Development, Gameplay Systems, Level Design, Real-Time 3D
- VR / XR: VR Development, VR Interaction Design, OpenXR Workflows, VR Simulation, Immersive Applications
- Programming: Python, Dart, C++ (Intermediate), Application Scripting, Technical Prototyping
- Applications: Flutter, Web Applications, UI Integration, Camera-Based Systems
- Embedded: Embedded Systems, ESP32, Arduino, Camera and Device Integration
- Systems: Networking, Performance Optimization, Simulation, Real-Time Interaction
- Version Control: GitHub

Professional Experience

DEO VERSE

Game / VR Developer | 2022 – Present | Chennai

- Developed VR simulation experiences with physics-based controls and real-time feedback using Unreal Engine and Blueprint workflows.
- Built architectural visualization applications for PC and VR platforms, creating interactive real-time 3D environments.
- Implemented gameplay and VR interaction systems, including user controls and real-time interaction workflows.
- Created camera-integrated selfie booth and interactive kiosk applications combining software and device integration.
- Developed level-design workflows and real-time 3D environments for interactive visualization and simulation use cases.
- Worked on performance optimization for real-time applications to support responsive interactive experiences.
- Contributed to medical visualization applications, including DICOM and anatomy-focused interactive 3D workflows.
- Worked across professional applications including Deo Vision – DICOM Viewer, D-Tiler, DeoVerse Simulator, Dhaksha, Anatomy, and Deo + Med + Defence.

Professional Projects & Applications

Deo Vision – DICOM Viewer

Medical visualization application focused on viewing and interacting with DICOM medical imaging data.

D-Tiler

Visualization-focused application developed within the Deo Verse professional application portfolio.

DeoVerse Simulator

Simulation application involving real-time 3D environments, interaction, and immersive experiences.

Dhaksha

Interactive technology application developed within the Deo Verse professional environment.

Anatomy

Medical and anatomical visualization application focused on interactive 3D visualization.

Deo + Med + Defence

Professional application/workstream involving real-time visualization and interactive technology for specialized use cases.

Selected Professional Scope

- VR simulation and immersive application development.
- Architectural visualization for PC and VR platforms.
- Medical and anatomical visualization.
- Real-time 3D environment and interaction development.
- Camera-integrated applications and interactive kiosk systems.
- Performance optimization and real-time application workflows.
- Embedded-system and device integration using ESP32 and Arduino.

Education

Amrita Vishwa Vidyapeetham — Bachelor of Computer Applications (BCA)

2025 – Present | Expected Graduation: 2028

Erode Institute of Technology — Diploma in Mechanical Engineering

2020 — Completed

Professional Interests

- Game Development
- VR / XR Development
- Real-Time 3D Development
- Simulation
- Architectural and Medical Visualization
- Interactive Applications
