

CHANDRU CHANDRAN

GAME DEVELOPER | VR DEVELOPER

Chennai, India | 8270773803 | chandruchandran0712@gmail.com

Portfolio: chandruchandraan.github.io/chandru-portfolio/

LinkedIn: linkedin.com/in/chandru-chandran-b46b312aa/

Executive Summary

Game and VR Developer with professional experience in real-time 3D development, VR simulation, architectural visualization, medical visualization, and interactive applications. Experienced with Unreal Engine, Blueprint development, VR interaction design, level design, networking, and performance optimization. Hands-on experience delivering PC and VR applications across visualization, simulation, embedded systems, and interactive media. Focused on building practical, immersive, and technically reliable real-time experiences.

Technical Skills

- Game / 3D Development: Unreal Engine, Blueprint Development, Gameplay Systems, Level Design, Real-Time 3D
- VR / XR: VR Development, VR Interaction Design, OpenXR Workflows, VR Simulation, Immersive Applications
- Programming: Python, Dart, C++ (Intermediate), Application Scripting, Technical Prototyping
- Applications: Flutter, Web Applications, UI Integration, Camera-Based Systems
- Embedded: Embedded Systems, ESP32, Arduino, Camera and Device Integration
- Systems: Networking, Performance Optimization, Simulation, Real-Time Interaction
- Version Control: GitHub

Soft Skills

- Technical Problem Solving
- Cross-Domain Collaboration
- Adaptability across software, embedded systems, visualization, and interactive media

Professional Experience

DEO VERSE

Game / VR Developer | 2022 – Present | Chennai

- Developed VR simulation experiences with physics-based controls and real-time feedback using Unreal Engine and Blueprint workflows.
- Built architectural visualization applications for PC and VR platforms, creating interactive real-time 3D environments.
- Implemented gameplay and VR interaction systems, including user controls and real-time interaction workflows.
- Created camera-integrated selfie booth and interactive kiosk applications combining software and device integration.
- Developed level-design workflows and real-time 3D environments for interactive visualization and simulation use cases.
- Worked on performance optimization for real-time applications to support responsive interactive experiences.

- Contributed to medical visualization applications, including DICOM and anatomy-focused interactive 3D workflows.
- Worked across professional applications including Deo Vision – DICOM Viewer, D-Tiler, DeoVerse Simulator, Dhaksha, Anatomy, and Deo + Med + Defence.

Selected Outcomes

- Contributed to 6 named professional applications/workstreams documented in the source resume.
- Delivered work spanning VR applications, PC applications, real-time 3D visualization, simulation, and embedded-system integration.
- Applied Unreal Engine and Blueprint-based development across multiple interactive and visualization use cases.

Education

Amrita Vishwa Vidyapeetham — Bachelor of Computer Applications (BCA)

2025 – Present | Expected Graduation: 2028

Erode Institute of Technology — Diploma in Mechanical Engineering

2020 — Completed
